When you're in a rush, it's nice to know your tasks will be taken care of as soon as you launch the app. For example, if you're in the middle of typing in a document and suddenly feel a need to search for an app or a specific file, KEYMACRO can help. It's also a nice addition to your keyboard, since it lets you key in emails, phone numbers, and URLs using your keyboard, making it faster and easier than hunting for your mouse. KEYMACRO enables you to search your entire computer for apps, documents, downloads, and photos, and it's great because it includes a Favorites folder to help organize your favorite items. You can also open any item you have pinned in the Favorites folder, either from the keyboard, or using a hotkey. Plus, the program allows you to capture URLs and email addresses, and then copy them right from the keyboard.
