For every phone or tablet, whether you're an iPhone, Android, Samsung, LG or LG, the full source code to our camera apps, including our flagship cameras, is now available as open source.. Google Galaxy Gcam 3.3.4 Version.Q: How to search for multiple items in ListView in Android I've done a search but couldn't find a solution. I'm having some trouble on how to search my ListView on my app. What I have is a ListView that is populated by an async task. It will display as shown on the image. What I want to do is to search in the ListView by pressing the magnifying glass on the top left, and then it would be like this I'm not sure if this is possible. I've tried searching but couldn't find a solution. How to achieve this? Thanks in advance. A: You can use android:focusable="true" to specify the location you want to be able to receive the focus, and android:imeOptions="actionSearch" to specify that the search button should create an intent with extra data that will be received and sent to the SearchableInfoService to perform the search. Something like this:
